***Reasons For Allowance***

The following is an examiner's statement of reasons for allowance: In view of the applicants' amendment/response filed June 6, 2005 in which it was established that Dellacoletta does not teach or suggest several key aspects of the process required to produce the polyimide sulfone, notably Dellacoletta does not teach or suggest analyzing the reaction product for residual amine or anhydride end groups or the addition of additional monomers or capping agent to keep the total amine and anhydride end group concentration below 120 meq/kg of resin; nor does the reference teach or suggest methods for obtaining a product with volatile content below 500 ppm; thus claims 1-65 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lindway and Khouri are cited to show the state of the art of polyimide polymers and method of preparing..
